

# SEASONAL METERS

A customer may be interested in a seasonal (sometimes called water only) meter if they notice their bill spikes dramatically during the summer months due to watering, irrigation system(s) or pool filling (any water that doesn't go into the sewer system).

Initially the customer would need to contact a plumber to have some line work done for the meter installation.

Once that is completed, they need make an appointment with the City to install the meter by calling the billing clerk at 603-352-3239.

At this time, the cost for the service call is \$45.00 and the cost of the meter is \$319.41.

After the initial charges for the installation and meter, they'll be billed once per year for water consumption (no sewer charges).
